

The Bloom's Ball Book Report

DIRECTIONS: First, you will choose your own book from the list below to read and complete the following project. Then, you will create a 12-sided Bloom's Ball that contains each one of the elements on the checklist below. The Bloom's Ball can be made out of printer paper or construction paper in any color of your choosing. You will need to print out 12 of the Bloom's Ball circles with pentagons inside. You will then add the elements from the checklist below within the PENTAGON of each circle. You may decorate or add drawings to any unused space to make your ball more visually appealing. When you have finished with each circle, you must assemble the ball by cutting around each circle, and then folding the flaps of the circle around the pentagon inwards. Then tape or staple the flaps of each of the circles together to form a 3D ball (glue will not hold the ball together). Watch this YouTube video if you need help with assembly: <https://goo.gl/dgqJsk>. See images of an example of a finished Bloom's Ball to the right of these directions.
